Environmental Stewardship Award

Dr. Peter Wells, recently retired from Environment Canada in Dartmouth, NS, was presented with the BoFEP "Environmental Stewardship Award" for 2006

This award is presented to "an individual who has *contributed significantly to the environmental health/sustainability of the Bay of Fundy* — preferably someone best described as an 'unsung hero', who has not been in the limelight, but has laboured behind the scenes in advancing the Mission and promoting the Principles of BoFEP".

Peter has been a driving force behind many of BoFEP's science-oriented activities, particularly the biennial workshops, technical reports and the activities of several of the working groups. He has been untiring as an editor of, and contributor to, all of the Workshop Proceedings. Congratulations Peter on this well-deserved award and thanks for all the energy, enthusiasm and support you have given to BoFEP ever since its inception.
